ACT Community Clubs: Community Contributions

Beneficiaries by ACT electorate

September 2026

Companion to ACT Community Clubs: Financial Challenges

An indicative list of community contribution beneficiaries.

Executive summary

Community support across Canberra

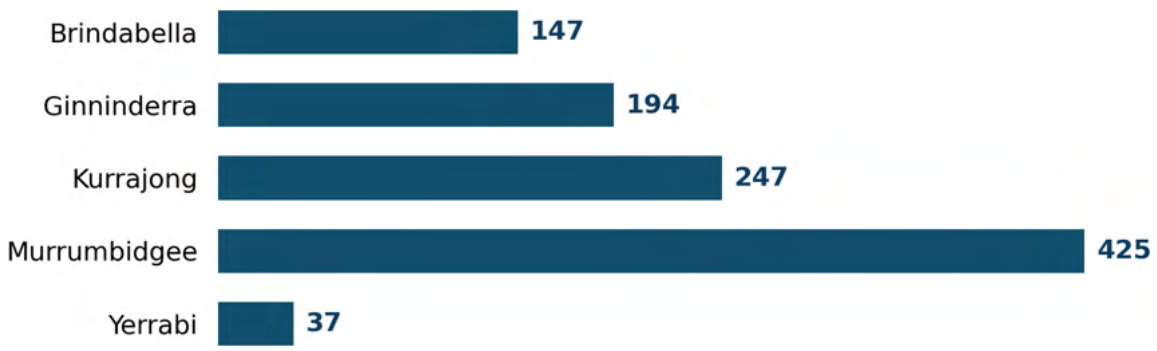

Community contribution records identify almost 1,000 named beneficiaries, including community organisations, schools, sporting groups and programs supported through Canberra clubs. Behind those names are teams taking the field, volunteers working together and places where people find company and connection.

963 distinct recorded beneficiary names • 1,295 entries • 5 electorates

The directory contains 963 distinct recorded names and 1,295 support entries across reporting periods. Names include organisations, programs, facilities and other recipients; they are not a verified count of separate organisations. Some relationships appear in more than one year.

Community reach by electorate

Distinct beneficiary names recorded within each electorate

Directory entries: Brindabella 158; Ginninderra 213; Kurrajong 279; Murrumbidgee 599; Yerrabi 46.

Electorate name counts overlap: the same name can appear in more than one electorate. Locations include club-base proxies and club-supplied allocations. The chart shows recorded coverage, not relative need, expenditure or the number of people reached.

What the records show

Beneficiaries include Tuggeranong Men's Shed, Ginninderra Junior Cricket Club, Canberra Hospitals Foundation, Malkara Specialist School and the Combined Probus Club of Woden-Weston. The records cover cash and in-kind support as well as club-run programs.

This is an indicative record across reporting periods, not a list of current commitments. A group's absence does not mean it received no support. Financial pressure on clubs can affect these relationships and the community activities behind them.

Executive summary continued

Six examples of community support

The records show how club support reaches everyday community life. These examples draw on the reporting periods shown; they do not establish that every contribution continues today.

1 Junior cricket supported by several clubs

Ginninderra Junior Cricket Club is named by Belconnen Bowling, Labor Club Group, Raiders Belconnen and Southern Cross across 2023–24 to 2025–26. Those relationships connect several clubs with the same junior sporting community, showing how support can extend well beyond a club's own teams.

2 A local men's shed

Southern Cross's 2025–26 schedule names Tuggeranong Men's Shed Inc. Club support reaches places where people can share skills, enjoy company and build local connections. For groups such as a men's shed, the value of that connection goes beyond a sporting result or a balance sheet.

3 Specialist schools

Malkara Specialist School and Cranleigh School are named in Southern Cross's 2025–26 schedule. Their inclusion brings specialist education into the picture: club support reaches school communities as well as sporting teams, charities and social groups.

4 Health-related community support

Canberra Hospitals Foundation appears in Southern Cross's 2025–26 schedule. The relationship places health-related community support alongside sport and recreation. It is a reminder that the organisations supported by clubs serve needs that extend across Canberra and beyond an individual suburb.

5 Cultural participation

Croatia Deakin's 2024–25 statement records support for HFS Croatia Folkoric Group. Cultural groups give people opportunities to share traditions and maintain connections across generations. This example shows how the club's community role extends beyond football into cultural participation.

6 Social connection through Probus

Combined Probus Club of Woden-Weston is named in Croatia Deakin's 2024–25 statement. Support for groups such as Probus connects clubs with the everyday social life of older residents. Community contribution records capture these quieter relationships alongside larger sporting and charitable activities.

Version 2.7 | Updated 28 September 2026

Why this matters

Community clubs are more than venues. These records identify almost 1,000 named beneficiaries, including schools, sporting groups, charities, cultural organisations and community programs. Club sustainability therefore matters in every ACT electorate. When a club's capacity to contribute falls, the consequences can reach the teams, volunteers, families and community groups that rely on its support.

Where club support reaches

A directory of the organisations, groups and programs named in the available club contribution records.

Canberra clubs help sporting teams take the field, community groups find a place to meet, schools raise funds and charities deliver their work. That support is spread across the Territory and often crosses electorate boundaries.

The companion *Financial Challenges* publication examines the capacity of clubs to keep operating and investing. This directory identifies the community relationships behind that financial picture. A reduction in a club's capacity can affect organisations well beyond its own suburb.

This directory brings together named beneficiaries and programs from annual reports, community contribution returns and supplementary club information. It contains 1,295 entries across reporting periods. Its 21 contributing club or group labels include consolidated groups and individual venues; they are not a venue census. The companion financial report covers 19 audited reporting entities and 33 licensed venues. These are different reporting populations, not competing counts of sector size.

This list is indicative rather than comprehensive. Reporting periods and the level of beneficiary detail vary. An absent name does not mean no support was provided. An entry does not establish that support continues today or that the beneficiary serves only the electorate shown.

Electorate	Entries	Published location	Local area / club allocation	Club proxy
Brindabella	158	26	19	113
Ginninderra	213	55	15	143
Kurrajong	279	31	14	234
Murrumbidgee	599	35	27	537
Yerrabi	46	11	32	3
Total	**1,295**	**158**	**107**	**1,030**

The data in this publication has been compiled from the most recent publicly available annual reports and community contribution records that identify individual beneficiaries, supplemented in some cases by information provided directly by clubs. Where current records disclose only aggregate totals, or where clubs provide recurrent support and a more recent beneficiary-level schedule is unavailable, historical records have been retained to present a fuller picture of the organisations, programs and activities supported over time. The publication is therefore an indicative longitudinal record and should not be read as confirmation that every listed contribution continues in the current financial year.

Financial context: the companion report records $11.07 million in audited statutory community contributions across 14 disclosing entities within its 19-entity sample. Reporting dates span October 2023 to February 2026. This mixed-period coverage total is not a current-year industry total or an electorate allocation. Supplementary schedules have not been added to it.

An entry is a beneficiary or program paired with a contributing club and reporting period. Entries are not a count of unique organisations or people. Obvious duplicate disclosures within the same club-period have been reconciled across sources. Distinct source names, branches and programs are retained where identity cannot be established safely. The table must not be used to rank electorates by community benefit.

How to read the directory

Allocation follows the beneficiary first

Published locations, school campuses and sporting bases are used where established. A source that explicitly identifies a local residents group, council or similar local group is labelled as a named local area. Where a beneficiary's location remains unresolved, its entry is allocated to the contributing club's electorate.

The location column shows the evidence

V - published location: a public source identifies a base, campus or facility. Campus affiliation and a hospital-linked base are mapping inferences, not a check of the recipient's registered office.
L - named local area: the contribution record identifies the local community represented. A street address has not been independently verified.
P - club proxy: the location shown belongs to the contributing club, not a confirmed beneficiary address.
C - club-supplied allocation: the club nominated the electorate in its 17 September 2026 update. This has not been independently verified and is grouped with named local areas in the summary table.

Groups operating several venues

An identifiable contributing venue takes precedence. For consolidated schedules without a venue split, the group base is used: Southern Cross at Woden, Canberra Labor Club at Belconnen, Burns at Kambah and Eastlake at Griffith. These are explicit allocation assumptions. A future venue-level schedule can replace them.

Time and scope

Reporting periods vary and are shown against each entry. Older records are retained where more recent beneficiary details are unavailable. Where a later public or club-supplied schedule names beneficiaries, that later club-period has been added without deleting the historical disclosure. An asterisk marks a reporting period that requires confirmation. Statutory fund payments are excluded because their ultimate community beneficiaries are not identified here.

What an entry represents

The names include external bodies, informal groups, club sporting programs, facility users, awards and individual recipients. Program, facility and individual entries are marked. Generic names such as “Probus” remain unresolved labels and are not merged across clubs. Political recipients are included and identified without drawing conclusions about their legal treatment.

Contribution values and wider reach

This directory does not assign a dollar value to entries or electorates. Earlier entry-weighted estimates have been withdrawn because their underlying calculation has not been reconciled to the current audited dataset. Cash expenditure, in-kind valuations, statutory adjustments and women’s sport multipliers are different measures. An ACT-wide, national or interstate organisation may appear under a club proxy; that placement does not confine its reach.

Geography uses the electorate configuration applied at the 2024 ACT election. Primary address verification remains outstanding for proxy entries.

Brindabella

158 entries from available club records.

Data sources and analytical tools

Source material

This publication aggregates the available data from all sources reviewed for the ClubsACT research project: club annual reports and community contributions returns supplied to the project, supplementary beneficiary information, ACT Gambling and Racing Commission public records and ACT Legislative Assembly records. Duplicate club-period disclosures have been reconciled across sources. The source materials include named recipients of cash and in-kind support, community groups, sporting programs, facility users and other disclosed beneficiaries. The Legislative Assembly records reviewed provided policy and aggregate reporting context but did not identify further club-period beneficiaries suitable for inclusion. Repeated contributions to the same recipient are listed once.

Coverage and reporting periods

The list is indicative rather than comprehensive. The level of detail and reporting periods vary between clubs. Earlier records have been retained where more recent beneficiary information was unavailable, consistent with the project's longitudinal approach. Later public records that disclose named beneficiaries have been added as separate club-period entries. Public records that report only category or aggregate totals cannot support a beneficiary-directory entry. An organisation's absence does not establish that it received no club support.

Electorate allocation and analysis

Beneficiaries were grouped by ACT electorate using available location information, including schools, campuses, sporting facilities and organisational bases. Where a beneficiary’s location could not be established, the contributing club’s electorate was used. Consolidated returns use the group-base assumptions explained in the methodology. Entry counts describe recorded relationships across periods; they do not measure expenditure, current commitments or the relative benefit received by electorates.

Executive summary counts

Executive summary counts use the Version 2.7 directory. Repeated names were combined after standardising capitalisation and whitespace. Explanatory notes beneath names are excluded from the name count. Spelling variants and unresolved identities are retained; generic labels may cover different groups. Totals describe distinct recorded names, not verified organisations. Case studies use the sources listed above.

Tools used

OpenAI ChatGPT assisted with extracting and organising the reported information, researching locations, drafting explanatory text and preparing the publication. Python scripts were used to structure the beneficiary register, sort entries, apply electorate allocations and calculate entry totals. PDF and spreadsheet extraction tools supported the processing of source records. ReportLab was used to produce the PDF publication; python-docx and document rendering tools were used to prepare and check this Word edition.

Interpretation and limitations

The 1,295 entries pair a beneficiary or program with a contributing club and reporting period. They are not 1,295 unique organisations, current grants or continuing commitments.
